EDUCATION

University of Pennsylvania

May 2026

Master of City Planning

Philadelphia, PA

- Teaching Assistant for Smart City Practicum; Marketing lead of the Wharton-Weitzman Future of Cities Conference and the Student Planning Association; Student Admissions Ambassador

Simon Fraser University

May 2024

Bachelor of Arts with distinction, Major in Political Science

Burnaby, BC

WORK EXPERIENCE

Geospatial Researcher

Jan 2026 – May 2026

Penn Institute of Urban Research

Philadelphia, PA

- Designing spatial analysis workflows in ArcGIS and Python to evaluate the neighborhood-level reach and equity of Penn's cultural programming, translating findings into strategic guidance for university leadership on infrastructure investment.
- Benchmarking cultural asset mapping methodologies from peer anchor institutions and municipal cultural plans to recommend an analytical framework tailored to Penn's institutional context.

Design Fellow

May 2025 – Oct 2025

PennPraxis

Philadelphia, PA

- Built and maintained scalable data pipelines in R to ingest, clean, and integrate microdata for 245,000+ individuals from US Census PUMS and Data Axle, supporting statewide economic modeling.
- Conducted regional benchmarking of self-employment, wage disparities, and industry growth across Pennsylvania, with results published by the Pennsylvania Council on the Arts.

Knowledge Mobilization Lead

Jan 2024 – Dec 2024

Department of Gerontology, Simon Fraser University

Burnaby, BC

- Collected and processed spatial audit data across 20km+ of pedestrian infrastructure using the SWAN tool, identifying accessibility gaps and informing age-friendly urban design recommendations for older adult populations.
- Analyzed older adults lived experiences and built environment preferences using NVivo and photo-voice methods, translating qualitative findings into spatial recommendations for aging populations.

Public Diplomacy Intern

May 2023 – Aug 2023

United States Consulate Vancouver

Vancouver, BC

- Represented the U.S. Consulate at Vancouver diaspora community events and produced a public-facing article published in Mandarin on Share America, supporting Mandarin-language civic engagement and outreach to Chinese-speaking communities.
- Engaged 50+ community leaders across sectors to strengthen cross-sector partnerships and drive urban revitalization efforts through the Chinatown Cultural Preservation and Revitalization Conference.

SELECT PROJECTS

PhillyStat360: Vacant Property Risk Model | *Practicum*

May 2026

- Built an end-to-end machine learning pipeline in R and Python (scikit-learn) to predict parcel-level vacancy risk across Philadelphia's 520,000+ residential properties, using an ensemble of Random Forest and logistic regression calibrated with isotonic regression; conducted an equity audit across poverty quintiles to assess flag rates, supporting targeted city interventions.

Pennsylvania Creative Workforce Analysis | *Publication*

Oct 2025

- Designed a reproducible R-based pipeline integrating multi-year PUMS and commercial microdata to enable cross-state benchmarking of creative sector employment trends; findings published by the Pennsylvania Council on the Arts as a statewide policy resource for workforce and economic development planning.

Philadelphia Computer-Assisted Mass Appraisal (CAMA) Model | *Course Project*

May 2026

- Co-built a cloud-native mass appraisal pipeline on Google Cloud Platform (BigQuery, Cloud Run) applying machine learning to predict parcel-level assessed values across Philadelphia's residential and commercial tax base, integrating OPA assessment history and PWD parcel datasets, with outputs surfaced through a public-facing assessment review dashboard.

SKILLS

Programming: Python, R, PostgreSQL | **ML/Stats:** scikit-learn, tidymodels, PyTorch | **Geospatial:** ArcGIS, QGIS, GeoPandas, Leaflet | **Cloud:** Google Cloud Platform (BigQuery, Cloud Run) | **Other:** Illustrator, NVivo | **Languages:** English, Mandarin
